

**Autoarc** carbon arc lamp

**new**

Designed for modern  
projection techniques  
and  
automated systems

# Auto arc

The carbon arc lamp  
that is electronically controlled  
to give a  
constant light output

The carbon arc lamp with the built-in brain—  
an electronic 'master' unit controlling the  
carbon feed and automatically maintaining a  
constant light output.

**consider  
its features:—**

- ★ All the advantages of the carbon arc over other light sources.
- ★ Fully applicable to any automated system.
- ★ Electronically controlled.
- ★ Long running without carbon re-trim.
- ★ Can be powered by existing supply and rectifiers.
- ★ Low initial installation cost.
- ★ Economic and reliable performance.
