

The GAUMONT-KALEE "UNIVERSAL"

Automatic Drive for H.I., L.I., or A.C. Carbons. Continuous feed absolutely controlled resulting in uniformity of screen illumination. Sensitive hand feed for fine adjustment of carbon and crater position. 12" metal-backed Mirror of accurate elliptical figure, with optimum collection angle. Three point suspension mirror holder with quick release spring loaded catch. Lamp accommodates a 14" positive carbon and feeds of 9" for the positive and 5" for negative obtained without recarboning. External carbon scale shows available length of travel. Negative carbon guided near crater tip, adjustable vertically and horizontally by micrometer control knobs. Linked two-piece mirror screen and dowsers operated from either side. Cover plate and ash tray at base to facilitate cleaning with consequent longer life and trouble free service.

PRICE : Automatic Feed, Low or High Intensity

A.C./D.C. each £114 0 0

Hand Feed, Low Intensity each £95 0 0

Allowances made for your old equipment. Hire Purchase Terms if desired.

The GAUMONT-KALEE "COMMANDER"

Arc Lamp

A sturdy efficient arc lamp embodying refinements normally included in more expensive models.

12" short focus elliptical metal-backed mirror.
Hand or automatic feed models.

Low or High Intensity A.C./D.C. carbons.

Sensitive wide speed range automatic carbon feed.
Rheostat adjustment enables desired speed to be secured precisely.

Image of arc crater projected by periscope.

For D.C. use an Energised Magnetic Control is provided to ensure correct arc formation and to reduce risk of mirror breakage.

All mechanical parts situated in cool part of lamphouse.

Carbons can be fed by hand either simultaneously or independently.

Dowser is linked with a mirror protecting screen.

Lamphouse finished mid-stone enamel.

PRICE : Automatic Feed, Low or High Intensity
D.C./A.C. each £97 10 0
Hand Feed, Low Intensity each £75 10 0

Attractive allowances made for your old equipment.

Hire Purchase Terms arranged if desired.

Everything for the **GB-KALEE** Cinema and Theatre

For everything you need. . . .

The NEW YEAR seems to us to be the most appropriate time to issue this larger and consolidated edition of our "Pocket Catalogue," and it gives us the opportunity to extend to our many friends in the industry the Compliments of the Season and our wishes for a progressive and prosperous 1950.

Although this Catalogue embodies all the products included in the past few editions, it cannot possibly contain all the thousand-and-one items required in the day-to-day operation of the cinema or theatre which we can supply from "under one roof." But we believe you will find it of considerable use to you in simplifying your ordering and records. There is an index at the back of the book.

Our reputation, and our earnest desire that every transaction made with our Organisation shall be a mutually satisfactory one, ensures that you can order from this Catalogue with complete confidence, whether it be a bottle of film cement or a complete projection and sound equipment.

Those easily-remembered names "G.B-Kalee" and "Gaumont-Kalee" are hall-marks on all products emanating from this Company, whether of our own manufacture or selected by us as being the best for the job.

The GAUMONT-KALEE "PRESIDENT"

The World's most outstanding Arc Lamp

Completely new and distinguished in arc lamp design. Twin feed-motors are used to ensure maximum accuracy of control. 14" diameter elliptical metal backed mirror.

Uniformity of screen illumination
Maximum light from carbons and electricity consumed

Economical carbon consumption
Simplified operation, fully automatic

PRICE £150 each

Allowances made for your old equipment in part exchange.
Hire Purchase Terms arranged if desired.

INCREASED EFFICIENCY OF ARC LAMPS
INCREASED LIGHT ON SCREEN
AT NO EXTRA COST
WITH

G.B-KALEE METAL BACKED MIRRORS

The most accurate mirror made for Cinema Projection
The metal backing gives
Longer Life

Full protection to silvering

Continuous service even if glass is severely cracked
They are available for all makes of arc lamps, and their cost in many instances is below that of the inferior old type mirrors now being sold.

The "EXODUS" Model No. 3 DOOR CLOSER

Made by a firm with over 50 years experience in door and window mechanisms, including the famous "STANDARD" floor springs and "EXODUS" panic bolts, fitted in the majority of cinemas throughout the Country.

NOTE THESE IMPORTANT FEATURES:

- Operates right- or left-hand doors without prior adjustment or alteration of operating spring.
- Special ratchet enables the spring to be pre-loaded for different types of doors, giving greater flexibility than any other similar device.
- Exceptionally wide range of valve adjustment enables it to be used on any door between 30 and 150 lb. weight.
- Powerful flat-wire torsion spring for long life and smooth action.
- Adjustable hydraulic checking system giving fully controlled closing.
- All-steel construction—definitely leak and seep proof.
- Noiseless in action.
- Attractive outer shell of original design with concealed fixing screws.
- Simple to install—can be fixed by anyone who can use a screwdriver following the template given with each closer.

PRICE £3 EACH

Standard finish Gold or Silver, others to order at slight extra cost.

Specify "EXODUS" for perfect door control

DISPLAY BASKETS

Standing baskets for palms, artificial flowers etc., mounted on straight legs only and finished sprayed gold, gold and green, or to your requirements.

Brass bound hardwood Tubs, beautiful examples of the cooper's craft, can also be supplied.
Prices on application.

The new 'PREMIER' FILM-JOINER

for tri-acetate safety-base Film Stock

is the type used by leading film renters, studios and laboratories because of its rapid, easy and certain action.

Compact combined rotary cutting and dry scraping device, with specially designed serrated scraper so that not only the emulsion but also the correct depth of film base itself is removed before joining. It also ensures that the base is left slightly grooved to ensure permanent "weld" to joined edges.

The rotary cutter is pre-set

for accurate depth of cut. Special "scraping to cutting" position achieved by a simple movement of the central pressure bar.

The central bar spring loaded to ensure automatic pressure over the join.

May be permanently fixed to a table or bench. Working parts finished nickel plating; castings grey.

PRICE £4 4 0 EACH

The most efficient and economical method for conveying fumes from the arc lamp to the exterior. Easily installed, pleasing modern appearance. Exterior diameter 6", interior 5 7/8". **Price per foot 17/6**

Ceiling Plate and Ring, for fixing tube to all standard types of lamphouse chimney. **per set £2 10 0**

PYRENE AUTOMATIC FIRE EXTINGUISHER

Complete protection against fire dangers in Cinemas cannot be achieved until this automatic safeguard is introduced into the projection room. Although a great advance has been made in the design of modern projection equipment—the danger of film fires still remains. Fire safety is a responsibility that cannot be ignored—delay in providing adequate Fire Fighting Equipment may result in serious damage to valuable projectors and destruction of films. Even the lives of your patrons are threatened . . . the mere suggestion of fire may cause panic. The "PYRENE" Automatic Film Fire Extinguisher works quicker than fire itself and it has proved on many occasions that danger, damage, loss and injury due to film fires on projectors can effectively be eliminated.

METHOD OF OPERATION

The "PYRENE" Automatic Film Fire Extinguisher is so efficient and rapid in action that the flames are extinguished before more than a frame or so of film can be burned. The first flash of flame from the film in the projector instantly ignites either the primary or secondary fuse. This fuses the celluloid link and releases the operating trigger. The whole of the film track from spool box to spool box is therefore automatically and instantly saturated with CO₂ gas ; at the same time the arc is cut off and the motor stopped, thus preventing re-ignition of the film, which can be re-joined as with an ordinary breakdown and the performance continued with a minimum of delay.

SUITABLE FOR ALL PROJECTORS

The "PYRENE" Automatic Film Fire Extinguisher is the only effective means by which fire can be extinguished on cinema projectors. It can be fitted to all makes and models of projectors. Illustration opposite shows the Pyrene extinguisher fitted to the famous GAUMONT-KALEE 21.

Extra ways each **4 8**

All prices shown on pages 33, 34 and 35 are exclusive of lamps.

Fountains for indoor display

The Stokes fountain illustrated above is complete with a 17" perspex bowl and stands upon a chromium plated base in which there are fittings for coloured lights, controlled by a separate switch. It makes possible attractive displays at an economical cost without the need of special installation. It is simply plugged into the electric supply and does not require a mains water supply. No attention or maintenance is necessary. The fountain can be used continuously for 333 hours on one unit. It is heavily chromium plated to prevent corrosion and the robust construction and absence of rotary parts gives long life and freedom from breakdown.

Any voltage, 3 watts A.C. only

£15 15 0

Outdoor model for fitting to a statue or garden ornament complete with 9ft. heavy 3-core cable.

Any voltage, A.C. only

£10 10 0

There is also available a wide range of charming statues fitted with the fountain suitable for outdoor or indoor display. Further details and illustrations on request.

RUBBER MATS

The 'NUWAY' LINK MAT

Made of specially prepared tough-fibred rubber links with the whole of the fibres rubber impregnated. The links, serrated on their faces to give greater comfort, are woven on specially galvanized (rust-proof) steel wire which is practically everlasting and will withstand any amount of bending and exposure. "Nuway" mats have been supplied to the Atomic Energy Research Establishment, the "Queen Mary," Army, Navy and Air Force. Public Institutions and Education Authorities, etc.

The manufacturers have such confidence in the "Nuway" mats that they give an unequivocal guarantee to replace any of the mats listed below, which wears out under normal wear and tear within **15 years**.

	24" x 14"	28/7		23" x 14"	16/5
Type 'A'	28" x 16"	38/4	Type 'B'	27" x 16"	21/11
1" Links	32" x 18"	48/8	2" Links	31" x 18"	28/0
Close	36" x 20"	61/5	Open	35" x 20"	35/3

PREMIER WIND BENCHES

JUNIOR MODEL

Designed for use in cinemas where space is a vital consideration, but it is also eminently suited for use as an auxiliary to the deluxe model. Constructed entirely of metal and finished black crystalline with matt chromium bench top. The bench is totally enclosed back and sides, and is fitted with a "Premier" re-winder with film keep, and drawer for tools and spares. There is a recess below which will accommodate a 12 way film spool cabinet, but this is not an integral part of the unit. The bench occupies a space of 3' 8" by 1' 9"

PRICE £33

DE LUXE MODEL.

Designed to increase efficiency in the projection suite. Everything to hand in one complete unit—"Premier" re-winder with film keep, de luxe film joiner with scraper for both triacetate and nitrate film stock, film waxer, scrap film bin, compartments for bottles etc., drawer for tools and spares, "Premier" patent 12 way interlocking film storage cabinet and two open 6 way spool cabinets. Constructed entirely of metal finished black crystalline with matt chromium bench top. The whole unit occupies a space of 6' x 2'.

PRICE £75

RECORD CABINETS

Constructed of stout gauge sheet steel on an angle iron frame and legs. Finished black crystalline enamel. Partitioned into compartments to enable easy handling of records. Storage for approximately 50 records.

£7 11 8

The **AMBASSADOR** Chair

Exhibitors and Trade Press representatives who have examined and tested the "AMBASSADOR" chair have acclaimed it as the "ultimate" in cinema and theatre seating. It provides the utmost in sustained luxurious comfort. It is a complete departure from the old conception of seat design and construction. Perhaps more important to the Exhibitor, it requires the lowest possible maintenance. Everyone with interests in the entertainment industry should not fail to see the "Ambassador" at any of our Branch Showrooms.

Coloured illustrated catalogue sent on request.

PRICES

"Ambassador" chair with highly polished selected hardwood armpad, interior counterweight, and "Dunlopillo" balanced density seat and back units covered with:—

Brown shade large herringbone pattern Mohair Cloth, or Plain or Imprinted Duck, to any required colour, or Heavy Quality Spot Design Material green/white or blue/white, or "K" quality Rexine	per chair nett	£5	1	6
Woollen Tapestry rust or green shade, or Lasting cloth red rust shade	per chair nett	£5	3	6

Other covering materials available at various prices.

This is one of our standard range of cinema chairs which has been installed in hundreds of Cinemas throughout the country, offered at a price which must command the attention of every Exhibitor. The "Shirwood" is built in our own factory to our own specifications. It is solidly constructed, hard wearing, and extremely comfortable.

Brief specification:

SEAT: up to 20in. centre, any depth up to 18in., selected hardwood frame, sprung 16 springs in cage giving sprung and rolled edge effect all round, fully upholstered, underpart finished highly polished plywood.

BACK: up to 20in. wide, 20in. deep, hardwood frame, latest design continuous curve, with highly polished lin. top rail. Well upholstered purified flock, recessed plywood panel on outside.

STANDARDS: solid enclosed panel type for ends of rows, open panel centre, 10in. quiet action cantilever saddle brackets and Duplex silencing buffers.

ARMPADS: up to 10in. long, selected hardwood, highly polished scroll type, straight type dome top, or tapered.

Seats and backs upholstered in plain or attractive imprinted "Duck," patterned as illustrated above and dyed to any required colour or Herringbone pattern Mohair Cloth, or Spot design material, or 'K' quality Rexine

"KEEPALITE" Secondary Lighting System

The "Keepalite" system uses the mains interruption itself to trigger the safety circuit and takes over before the filaments have ceased to glow. It is therefore the ideal system of secondary lighting for cinemas.

Briefly, the "Keepalite" system incorporates a battery normally trickle charged, automatically switched on to the emergency lights when the mains fail, and quick charging by hand control. The use of static rectifiers eliminates the need for rotating machinery, and the whole apparatus (apart from the battery) is self contained and mounted in a ventilated sheet steel cubicle.

A typical installation would be as follows :—

DUTY. To maintain a circuit of safety or secondary lights continuously from the mains and automatically to maintain the supply for a further 3 hours from the battery during a supply failure; to trickle charge the battery; to fully charge the battery after any emergency discharge.

LOAD. Say 65 - 100-volt lamps averaging 30 watts each - 1950 watts total.

MAINS. A.C. 230 volts 50 cycles single phase.

BATTERY. 50 DBG.3 cells supplied sealed-in, filled with acid and fully charged. Capacity 90 ampere hours in 10 hours, or 64 ampere hours in 3 hours. Complete with cell-to-cell connectors and bolts and wood stand.

APPARATUS. Control cubicle with $3\frac{1}{4}$ " moving coil ammeter, milliammeter and voltmeter, switches, fuses, automatic change-over contactor (in compliance with B.S.S. 764/1937) and rectifier incorporating transformer and selenium rectifier units. Rectifier output 6 amperes. Step-down transformer to provide the normal A.C. supply to the 100-volt lights. Rating 2.5 kVA.

A wide variety of sizes is available. Brief particulars of some of these for 200/250 volt 50 cycle A.C. mains are shown below. Other sizes on request.

Equipment consists of sealed-in fully charged battery, stands, control cubicle, incorporating selenium rectifier, double-wound air-cooled step-down transformer and automatic contactor in compliance with B.S.S. 764/1937.

Equipment No.	Voltage of Emergency Circuit	Ampere - hour capacity of battery in		Total load in watts battery can supply for 3 hrs.	PRICE

SPOTLIGHTS

We are specialists in all forms of exterior and interior lighting and are fully equipped to serve and advise upon suitable equipment for Cinema and Theatre stages, Dance Halls and all places of entertainment. We shall be pleased to send any further information required, or arrange for one of our representatives to call and discuss your problems, without any obligation.

WEATHERPROOF SPOTLIGHTS

The 'MAJESTIC' Concentrating Spotlight Projector

For use with 500-1000 watt B.I. projector lamps. The Majestic floodlight will project a concentrated beam from 50 ft. to 350 ft., and is suitable for the illumination of clock-towers, tops of buildings etc., or where it is desired to concentrate the illumination within a prescribed area.

Constructed throughout of lead coated steel and fitted with special circular spill shields, parabolic metal reflector, G.E.S. lampholder with focussing adjustment, and watertight gland for cable entry. The front glass is fitted in detachable flange for access to lamp. Mounted on special stand giving angle adjustment in all directions. **PRICE £19 10 0**

Colour screen to fit over front, Red, Blue, Amber or Green ... each **£3 3 0**
Lamps 500 watt B.I. **23/0** 1000 watt B.I. **30/0** each.

The "RITZ" 500 watt Weatherproof Spotlight

Specially designed for outdoor use and is constructed of lead coated steel. Fitted with E.S. lampholder, 5" Silverlite reflector mounted on focussing tray with external adjustment. A glass splitter screen enables a soft edge intense circle of illumination to be projected. Colour screens can be inserted and the special stand permits angle adjustment in all directions. **PRICE £12 0 0**

Colour Screens : Red, Blue, Green or Amber each **10 0**
Lamp, 500 watt Type E. ... each **£1 10 0**

SPOTLIGHT 500 watt

An efficient and well made spotlight complete with 6" diameter lens, 3 colour screens in metal frames, Silverlite reflector and E.S. holder mounted on focussing tray with external adjustment.

MODEL W.S.3. On short stand **£7 15 0**

MODEL W.S.4. On telescopic floor stand
with heavy cast base **£10 16 8**

SPOTLIGHT 500 - 1000 watt

This spotlight is double cased, and has a new and improved louvred ventilation. Complete with 6" diameter lens, G.E.S. lampholder and Reflector, both mounted on independent focussing trays with external adjustment, three colour slides and colour wheel with fittings.

MODEL W.S.7. On short stand **£10 18 8**

MODEL W.S.8. On telescopic floor stand
with heavy cast base **£13 12 8**

BATTEN SPOTLIGHT 500 - 1000 watt

Of similar construction to Models W.S.7 and W.S.8 with double cased body, but with special enclosed focussing adjustments to prevent stray light from reaching the stage. Complete with adjustable suspension trunnion fitted with barrel clamp for 2" barrel, 3 colour slides and safety grill over lens.

MODEL W.B.S.1. **£9 4 0**

Also made as front of balcony spots, with special supporting brackets at the same price.

SPOTTING ATTACHMENTS

A special fitting designed to attach to the front of any of the above spotlights. Complete with three diaphragms and special combination of lenses. Ensures a sharp clear spot free from filament image.

£5 5 0

All prices shown on pages 62 and 63 are exclusive of lamps

"PREMIER" ALL-PURPOSE LANTERN

combined
**EFFECTS
SPOT and
SLIDE LANTERN**

The "Premier" Lantern has been specially designed for Cinemas and Theatres where the use of a slide lantern as well as a spotlight is required but where there is insufficient room in the operating box to install separate units. The Lantern is rigidly constructed, and mounted on a heavy cast pedestal stand, and embodies many special features.

HIGH INTENSITY L. 4P of 75 amperes capacity with magnetic flame control, giving great intensity of light and capable of projecting a brilliant beam up to 150 feet. The lamphouse is made from stout gauge sheet steel, and has doors each side, fitted with large windows for observation of the arc.

SLIDE PROJECTION ATTACHMENT, fitted with a 5" diameter cast condenser mount and a heat resisting rear lens. The metal universal slide carrier will accommodate the standard $3\frac{1}{4}" \times 3\frac{1}{4}"$ slides or $4" \times 3\frac{1}{4}"$ for projecting backgrounds. The brass extension tube has a rack and pinion focussing lens mount, fitted with 2" diameter lens, up to 26" focus.

DISSOLVER, 4" iris type giving a perfectly focussed spot of varying diameters.

BARN-DOOR CUT-OFF, adjustable for use horizontally vertically or diagonally, will provide a perfectly focussed strip of light of any desired dimensions.

COLOUR MEDIUMS are contained in specially designed holders permitting instantaneous colour change.

ADJUSTABLE COUNTER WEIGHTS ensure perfect balance at any angle and ease of operation.

STAND is the pedestal type, heavily built of cast iron and consists of base, column and pillar which rotates in the column. The lantern is bolted to the stand top, which is constructed of heavy gauge sheet metal. It is pivoted to the stand pillar and has semi-circular plates on either side in which are quadrant slots so that the lantern can be tilted to any desired angle.

TERMINAL BLOCK for mains lead is of the totally enclosed pattern and conforms to the latest Council Regulations.

FINISH is black, but any colour can be supplied at slightly increased cost.

PRICE £75. 0. 0.

Complete on stand, including Arc Lamp, Condenser, Lens, Slide Carrier, Curtain, Terminal Block and Leads and set of six coloured heat resisting gelatines in metal frames.

Hire Purchase Terms arranged, if desired

SPRAYERS

THE "Q" SPRAY

A moderately priced
sprayer with many
exclusive features

28/6
EACH

Instantaneous variable spray adjustment. Large capacity tank holds $1\frac{1}{4}$ pints. Mixing mechanism housed totally in the shell to obviate clogging with dirt and dust. Large filler cap is cut with coin slot to facilitate opening and filling. Trigger grip, non metallic handle. Stands in non-dripping position. Smooth easy and positive action. Ivory stoved enamel on solid brass, will not rust. All screwed parts machine cut.

The "ENOTS" Pneumatic Sprayer

Soundly constructed and will give years of service. Container is made of solid copper and holds four pints of essence. Pressure is obtained by means of the plunger type pump at the top. It gives a continuous mist like spray and is silent in action.

PRICE each **£4 17 6**

The famous Sturtevant No. 3 and No. 4 Portable Turbine Industrial Cleaners are now available for quick delivery. These heavy duty machines are specially built for use in cinemas and all buildings where large areas have to be cleaned speedily and thoroughly. Turbine vacuum cleaners greatly increase the life of furnishings and decorations by entirely removing dirt through the handling of a large volume of air at high velocity. Rotating brushes and beaters are not employed.

MODEL No. 3. A medium sized vacuum cleaner with three times the cleaning capacity of the domestic type. Its performance is a revelation in the speed of cleaning and the thorough manner in which it handles a multitude of operations. Mounted on two wheels with a skid in front, it can be easily moved around. It is also suited for sweeping smooth floors, walls, ceilings, and for staircase cleaning is portable enough to be readily handled by women.

The universal electric motor is rated at 1/3 H.P., suitable for any of the following voltages :— 100-110 or alternatively 200-230 and 230-250 v D.C., and A.C. 50 periods single phase.

PRICE £48 15 0

MODEL No. 4. A large size vacuum cleaner that will meet the heaviest demands. It has six times the cleaning capacity of a domestic model. Built largely of aluminium it is comparatively light and being mounted on three rubber tyred wheels, it can be readily used by women, and wheeled up and down stairs. Beautifully designed aluminium cleaning tools with swivelling joints reinforced by gunmetal for use on carpets and floors, and other tools for upholstery, curtains, walls etc., are supplied.

The universal electric motor develops 1/2 B.H.P. on 100-110 volts D.C. and A.C. single phase—alternatively on 200-250 volts D.C. and A.C. 50 periods single phase.

PRICE £84 0 0
