SIMPLEX PROGRESS AND SIMPLEX PRECISION

In the past two years the International Projector Corporation has made remarkable advances in the design and manufacture of *Simplex* Projectors and Parts. Vast sums have been spent to increase ease of operation, wearing qualities of the mechanism and entertainment value of the picture. Realizing that audiences are more keenly aware of the differences between good and bad projection, theatre owners are more exacting than ever before and we have again anticipated the requirements of progressive exhibitors by many outstanding changes and improvements.

The new spiral bevel gears insure smoother operation, greatly reduce the noise level and are a tremendous stride forward in mechanism design and construction. Intermittent sprockets are hardened and then ground, which insures a definitely longer life and a far more accurate sprocket. The new shockproof gear has a Thiokol insert which permits the gear to take up the irregularities due to the action of the intermittent movement. These are only a few of the important improvements which have been incorporated in our later equipments and are the result of the work which is being constantly carried on by our research department and engineering staff.

Every *Simplex* part is made to meet definite practical requirements which improve projection and lower maintenance charges. Many vital parts are made to a ten-thousandth part of an inch - scientific accuracy that assures a rocksteady picture. *Simplex* precision is extremely important to prevent unsteadiness at the aperture, which is magnified hundreds of times on the screen. This "jump" or "sidesway" becomes annoyingly noticeable to patrons and can be prevented by installing new *Simplex* Projectors or by repairing or replacing with *Genuine Simplex Parts*. Hold regular patrons and get new ones with *Simplex* Projection which improves entertainment and box office value of the picture. Better Projection Pays. Neglect is poor economy. Repair - replace with *Genuine Simplex Parts*.

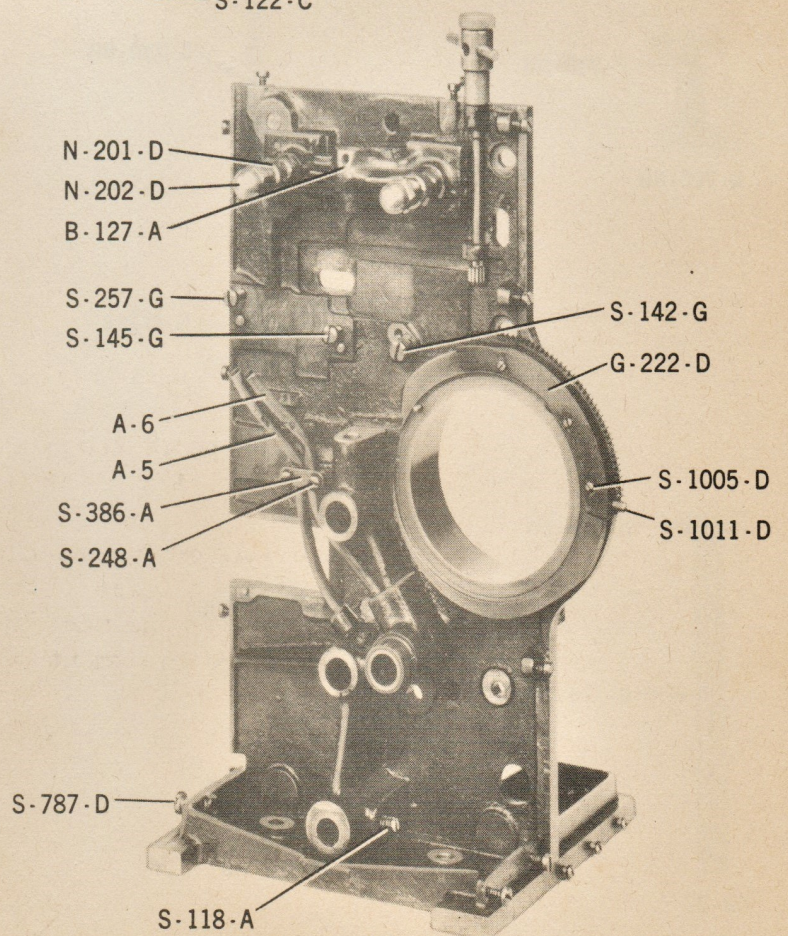

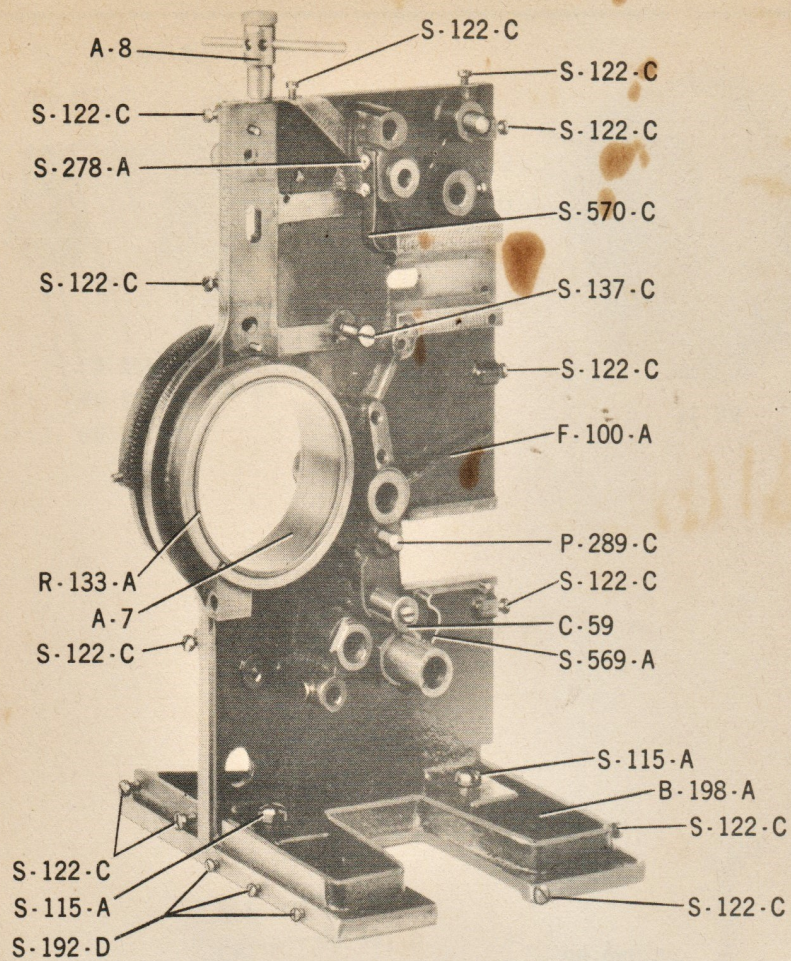

Simplex

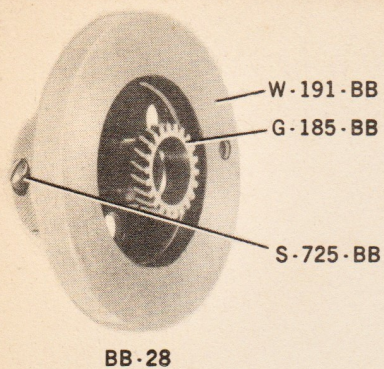

HOME OF SIMPLEX EQUIPMENT

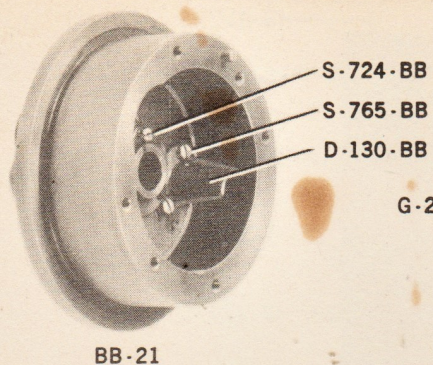

Oldest and largest factory in the world devoted to the manufacture of standard professional motion picture projectors. Here have been originated and perfected methods and standards which for over thirty years have given us an international leadership in the motion picture field. A thoroughly progressive spirit enables us to give theatre owners the highest possible value at the lowest possible cost. No other firm has facilities that are at all comparable to ours for the economical and efficient manufacture of motion picture equipment and parts.

Simplex service supplements *Simplex* quality. Exhibitors know they can rely upon *Simplex* Distributors for satisfactory installation of *Simplex* equipment, advice and help when emergencies arise and prompt delivery of genuine *Simplex* parts when needed. **GENUINE SIMPLEX PARTS** always give the greatest value and are absolutely essential to get the best results with **SIMPLEX PROJECTORS**.
