FILM MEASURER

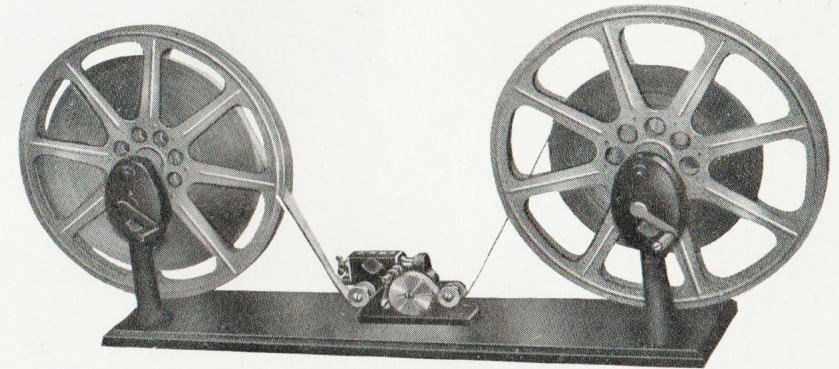

This Measurer as the illustration shows is substantially constructed and the working parts are machined to a fine degree of accuracy ; it is in use in the leading laboratories and renting houses and it is also an indispensable item of equipment with all progressive Amateur Cinematograph Societies.

It embodies these special features :

- ★ A polished high grade steel sprocket with two guide rollers and a spring tensioned sprocket roller.
- ★ A direct reading Counter up to 10,000 ft. which can readily be set to zero by the thumbscrew fitted at the side.
- ★ Is adaptable to 8 m.m. film (and this should be stated when ordering).
- ★ It is a product of the Manufacturers of precision Cinematograph Equipment which has been in daily use in Studios, Laboratories, Cinemas and Theatres throughout the world for the past half century.
- ★ It is reasonable in cost : £12-12-0

16 M.M. EQUIPMENT for use with the PREMIER FILM MEASURER
