

16 mm. MEASURERS FRAME COUNTERS SYNCHRONISERS

(STANDARD MODEL)

PREMIER 16 mm. Measurers, Frame Counters, Synchronisers are precision made throughout in the best quality materials with all working parts machined to a fine degree of accuracy and allowing for complete protection of the film with specially relieved rollers and sprockets. They are in use in the leading Laboratories and Renting Houses and form essential equipment in progressive Editing Rooms.

SYNCHRONISER/MEASURER/FRAME COUNTER

This Unit, as illustrated above, provides a Multi-Film Path with guide and tension rollers permitting film tracks to be accurately synchronised. It allows independent removal of any film track for editing and is essential equipment for matching sound to picture or dupe to master, etc.

It is provided with a tripping knob for reversing or setting. The counter will measure up to 10,000ft., at the same time recording the intermediate frames. The dial can be instantly set to zero. The whole unit slides into a channelled baseplate which can be permanently fixed to and aligned on the editing bench.

MEASURER/FRAME COUNTER

Provides all the refinements of the Synchroniser, but is suitable for handling one film path only. It is a most useful accessory for matching and editing film prints.

MEASURER

This unit will measure film footage up to 10,000ft. lengths and is a most handy equipment for Checking Departments of Film Lending Libraries and Renting Rooms.

(Heavy Duty Frame Counter to the above £3 extra)

Note.—These units can be used with our Track Reader Magnetic Extension Heads (Leaflet No. 113).
