

STANDARD MODEL

This very popular Stand, as shown in the illustration, folds up flat with the top tray folding inwards, and the Stand thereby occupies a minimum of space and is easily portable.

The whole unit is most compact and can be erected, or collapsed, with the minimum of ease and the maximum of speed. There are no loose parts to get lost.

The Stand is 4' 0" high and the top measures 21" x 13" to accommodate any Projector. It has a turned-up edge to prevent any sliding of the Projector during threading, etc.

As with other 'Premier' Stands this unit is most widely used in Government Departments, Educational Establishments, and Film Units, both here and abroad.

DE LUXE TROLLEY

JUNIOR TROLLEY

It is fitted with both castors and fine screw adjustable feet; the former for mobility and the latter to counteract floor unevenness. These feet are independently adjustable to maintain correct picture alignment with the screen and in operation will lock the Stand in any pre-set position.

The unit is generously supplied with three platforms measuring 21" × 13", 18" × 12" and 20" × 14" respectively. The top Projector platform has a fine thread tilt adjustment 7 degrees up or down.

The stand is 4' 0" high to allow for a clear projection beam. The whole unit is most compact and portable, and can be quickly assembled or closed without loose parts.

Attractively finished in Silver Polychromatic.

Price

"You are to be congratulated on having produced an article which embodies all the necessary requirements to the job for which it has been designed"

Comprises a radiused angle steel frame and supporting side bars to guarantee absolute rigidity.

The Trays fit within the frame when the Stand is folded up flat, and it is erected or collapsed merely by loosening six wing nuts and folding the trays into position.

The Stand is fully mobile and has adjustable locking feet with rubber ferrules to ensure stability at all times and counteract any floor unevenness.

The Stand is 4' 3" high and the generous proportions of the platforms measuring 21" × 13" and 24" × 11" respectively, accommodate any Projector and its accessories.

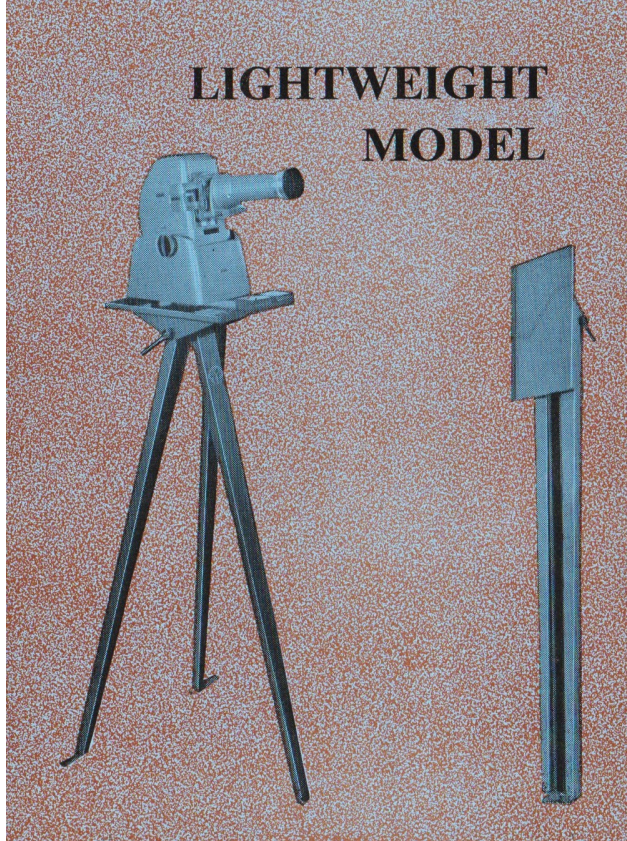

Ideally suited to Educational Establishments, Mobile Cinemas, and the Home.

Superbly finished in Grey Polychromatic Enamel.

Price

"It is a first-class piece of apparatus, and I am very pleased with it"

LIGHTWEIGHT MODEL

- ★ Portable, robust, easily erected and collapsed
- ★ Tilt to projector platform (Size $8\frac{1}{2}'' \times 13''$)
- ★ No loose parts
- ★ Ideal for slide and silent projectors

This new all-metal "Premier" stand meets the need for a portable, durable and modestly priced equipment.

The unit folds flat when collapsed and when erected is 44" high. Attractively styled in polychromatic enamel.

Most moderate in price

EPIDIASCOPE STAND

This Stand is based on the well-known design of our 'Junior' Trolley Model and incorporates a special size Tray with deep turn-up to accommodate with complete versatility most makes of Epidiascopes.

The well-known rigidity of this Stand and free-running castors make it ideally suitable for the handling of the rather bulky Epidiascope Equipment.

The Stand is 4' 3" high and the top platform measures 28" x 20".

Interlocking feet are provided to ensure stability at all times and counteract any floor unevenness.

Attractively finished in
Grey Polychromatic Enamel.
