* **Spool Cabinets**

Tools and Spares Cabinets

Projector Stands

The items marked with an asterisk will prove most useful adjuncts to the Premier Junior Model Rewind Bench.

REWIND BENCHES

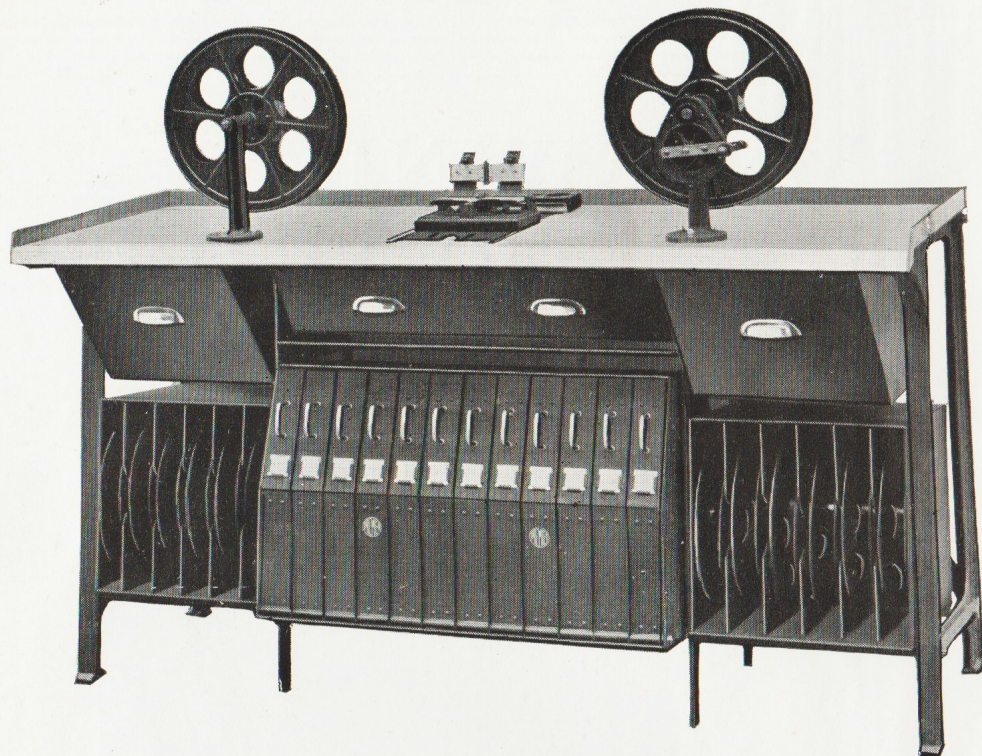

REWIND

DE - LUXE MODEL

BENCHES

JUNIOR MODEL

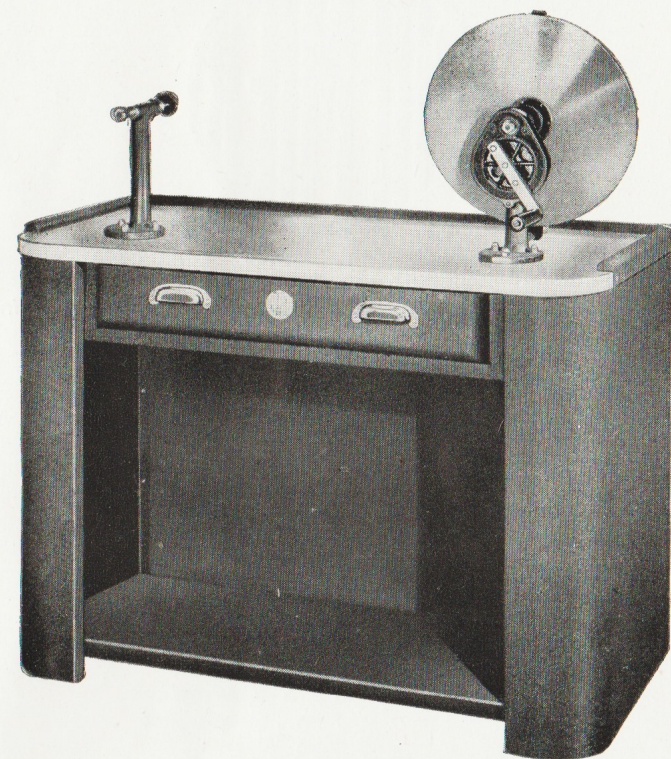

This **de luxe bench** is now acknowledged as an essential item of equipment in all modern cinemas—and indeed in up-to-date film studios and laboratories.

It is **constructed entirely of metal**, thereby being not only fire-proof but impervious to all adverse climatic conditions. It can be accommodated in a space of 6 feet x 2 feet.

This all-in unit comprises not only the **bench top** itself which is most attractively finished with matt chromium plating, but also the **Rewinder** (fitted with a **Premier Film Keep**); the **de luxe Film Joiner** (with the popular new scraper for use with both Tri-acetate and Nitrate film stock); the **Film Waxer**; accessible **compartments for Cement, Bottles and Brushes**; the **Scrap Film Bin**; the spacious **drawer accommodation** for tools and spares; the **Premier Patent 12-way Interlocking Spool Cabinet**; and the **two open 6-way Spool Cabinets**.

The complete assembly as above, which is most elegantly finished in black crystalline, is moderate in price, being only:

£75-0-0

This **Junior Model** has been primarily designed for smaller cinemas where space considerations preclude the installation of the de luxe model; but it is eminently suited for use as an auxiliary to its 'big brother' in super cinemas where two benches are required.

It is also **constructed entirely of metal** and it is finished in the same attractive and durable manner. It can be accommodated in a space of 3 feet 8 inches by 1 foot 9 inches.

This **Junior Model** comprises the bench itself together with: the **Rewinder** (also with the **Premier Film Keep**), and **drawer accommodation** for tools and spares.

There is a recess below dimensioned to accommodate any of the various Premier 12-way Model Spool Cabinets (though a cabinet is not an integral part of the unit).

The cost of the unit, comprising **bench, rewinder and drawer**, is indeed again most moderate at:

£33-0-0
