THE MOTION PICTURE INDUSTRY'S MOST ADVANCED THEATRE SOUND SYSTEM

The Simplex XL Transistor Sound System is not just a tube system converted to transistors...it is a *new sound system* in design and in performance.

Engineered by Altec Service Company and General Precision Laboratory... the system combines all the latest developments in transistor circuitry. For example, the pre-amplifier is a completely contained unit that just plugs into the lower compartment of one XL soundhead. An apparatus unit plugs into the same compartment on the other soundhead to provide changeover and volume control facilities. In emergencies, either unit can be replaced as quickly and easily as inserting an electric plug into a wall outlet.

With the Simplex XL Transistor Sound System, much of the equipment clutter of a typical projection room can be eliminated. The front wall is completely cleared and two 3/4" conduits running from one pedestal to the other are all that's necessary to accommodate inter-soundhead wiring.

Additional specifications and data may be found on the back page. For complete details and estimates...call your nearby National man.

out-performs them all!

- Utilizes latest transistor circuits and newest type plug-in transistors.
- Versatile...accommodates any size theatre up to 2,500 seats.
- Economically installed...components are pre-wired at factory to avoid unnecessary expense during installation.
- Used with new Altec-Lansing model 351-A transistor power amplifier. This compact (91/8" x 81/4" x 43/8"), lightweight (14.5 lb.) unit has an available power of 50 watts and a wide frequency response range from 20 to 20,000 c.
- Output of amplifier unit can be controlled to work with any desirable speaker system.
- Developed by the combined engineering skills of Altec Service Company and General Precision Laboratory.
