THE ROSS PROJECTOR MECHANISM
With Rear Shutter showing Gate and Masking Assembly.

ROSS LTD., since entering the field of the manufacture of Projection Equipment, have done a great deal towards perfecting the art of projection, and have proved themselves to be the leading authorities in this class of work. Their products have won universal appreciation, and have found their way into all corners of the world.

This is largely due to the untiring research work continually going on at their wonderful works at Clapham Common. Coupled with the march of progress and the rapid installation of Sound Producing Systems into many cinemas, Ross Ltd. introduced the F.C. Projector. The design and construction of this machine was at once accepted as the best and most efficient for all Sound Producing Systems now in use.

It possesses all the fine qualities demanded in a modern projector, is of British manufacture throughout, the hall mark of strength and durability, giving unfailing service and complete satisfaction.
